

Attorney Docket No.: ISPH-0773
Inventors: Freier and Dobie
Serial No.: 10/667,022
Filing Date: September 18, 2003
Page 2

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

Claim 1 (currently amended): A compound ~~8 to 80 nucleobases~~
~~8 to 50 nucleobases~~ in length targeted to a coding region of a
nucleic acid molecule encoding human phosphoinositide-3-kinase,
regulatory subunit 4, p150 (SEQ ID NO:4), wherein said compound
specifically hybridizes with said ~~nucleic acid molecule~~ encoding
~~phosphoinositide-3-kinase, regulatory subunit 4, p150~~ coding
region and inhibits the expression of human phosphoinositide-3-
kinase, regulatory subunit 4, p150.

Claim 2 (original): The compound of claim 1 which is an
antisense oligonucleotide.

Claim 3 (original): The compound of claim 2 wherein the
antisense oligonucleotide comprises at least one modified
internucleoside linkage.

Claim 4 (original): The compound of claim 3 wherein the
modified internucleoside linkage is a phosphorothioate linkage.

Attorney Docket No.: **ISPH-0773**
Inventors: **Freier and Dobie**
Serial No.: **10/667,022**
Filing Date: **September 18, 2003**
Page 3

Claim 5 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified sugar moiety.

Claim 6 (original): The compound of claim 5 wherein the modified sugar moiety is a 2'-O-methoxyethyl sugar moiety.

Claim 7 (original): The compound of claim 2 wherein the antisense oligonucleotide comprises at least one modified nucleobase.

Claim 8 (original): The compound of claim 7 wherein the modified nucleobase is a 5-methylcytosine.

Claim 9 (original): The compound of claim 2 wherein the antisense oligonucleotide is a chimeric oligonucleotide.

Claim 10 (original): A compound 8 to 80 nucleobases in length which specifically hybridizes with at least an 8-nucleobase portion of a preferred target region on a nucleic acid molecule encoding phosphoinositide-3-kinase, regulatory subunit 4, p150.

Claim 11 (original): A composition comprising the compound of claim 1 and a pharmaceutically acceptable carrier or diluent.

Claim 12 (original): The composition of claim 11 further comprising a colloidal dispersion system.

Attorney Docket No.: **ISPH-0773**
Inventors: **Freier and Dobie**
Serial No.: **10/667,022**
Filing Date: **September 18, 2003**
Page 4

Claim 13 (original): The composition of claim 11 wherein the compound is an antisense oligonucleotide.

Claim 14 (original): A method of inhibiting the expression of phosphoinositide-3-kinase, regulatory subunit 4, p150 in cells or tissues comprising contacting said cells or tissues with the compound of claim 1 so that expression of phosphoinositide-3-kinase, regulatory subunit 4, p150 is inhibited.

Claims 15-20 (canceled).
